

Structural Integrity Works (5 bridges) Case Study

H&A Rail Ltd secured the winning bid to complete structure and integrity works as part of the underbridge strengthening and refurbishment scheme in Wessex.

We were awarded all 5 locations to complete de-vegetation, specialised repointing, replacements of brickwork and large areas of structural re-casing.

All works were successfully delivered and signed off to NR standard for masonry repairs and delivered in collaboration with our key client and valued supply chain.

- Re-casing and Weather struck Re-pointing
- Spot Brick replacement of defected bricks
- Removal of defected layers and rebrick retaining wall
- De-vegetation and clearance of tree stumps and heavy roots causing structure defects to brickwork
- London yellow stock and weathered red bricks were matched to keep existing heritage look of underbridges
- All works were successfully delivered and signed off to NR standard for masonry repairs
